

## Omnia L - Furniture Damped Hinge

### Description

Omnia L is a new hinge for furniture wood doors starting from 14 mm and for aluminium frames. The SlowMotion System technology is miniaturized and integrated to offer a higher design flexibility to furniture makers. Thanks to the solid design the hinge guarantees an optimal feeling during the door opening and closing. A strict Quality control in any process phase allows to reach 200k openings. The AnyClickSystem simplifies the door installation in particularly with more than 2 hinges per door.

### Statement of the jury

When opening and closing cabinet doors, haptics play an important role in the overall perception of a piece of furniture. Thanks to its solid construction and integrated, miniaturised SlowMotion system technology, the new »Omnia L« hinge provides a high-quality operating experience. The door closes gently and quietly and also makes getting your fingers caught a thing of the past. Another advantage of the design is the so-called AnyClick system that makes the door installation easier than ever – especially with more than 2 hinges per door. Suitable for wooden doors with a thickness of at least 14 mm and aluminium profiles, the »Omnia L« hinge expands the possibilities of furniture designers.
